

Research Experience for Teachers

Summer Soybean Science Institute (3SI) in Manhattan, KS

WANTED: Teachers Grades K-6

Join us for a 3-week science immersion at Kansas State University! The primary goal of our institute is to help you gain experience teaching “science as inquiry.” Work with peers to develop a science unit around soybean that addresses *Next Generation Science Standards (NGSS)* and uses the scientific method. More importantly, learn how to teach “systems thinking” using a soybean seed.

Your Commitment?

June 12 to 30 (Mon-Fri, 9am to 4pm)

- Learn about soybean from “pod to plate”
- Work alongside K-State scientists
- Hands-on lab experiments and field trips
- Incorporate technology in the classroom
- And much, much more!

Benefits:

Stipend of \$1600 (+lodging for out-of-town teachers), up to \$500 in classroom supplies (to include iPod Touch or comparable device, plant stand, grow lights, soil, books, & classroom experiments), and becoming a better science teacher!

HOW TO APPLY: [3SI Online Application Form](#) (Due April 10, 2017)

Or copy and paste the URL below into your internet browser:
